

Relax whilst your money works harder

InvestEngine is the easy-to-use, intelligent online investment service that makes your money work harder so you don't have to. With InvestEngine, there are two ways to put your money to work.

General Investment Account

A globally diversified portfolio, regularly rebalanced to stay in line with your needs. Our buy-and-hold investment strategy uses index-linked funds to avoid the risk of over-dealing, maximise opportunity to capture growth and avoid losses, and reduce costs.

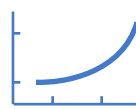

Stocks & Shares ISA

Our Investment ISAs are a great way to start your InvestEngine. You get the same benefits as a General Investment Account but with the added advantage that you can invest up to £20,000 tax free - so you pay zero income tax or capital gains tax.

For both, there's a £2,000 minimum investment and you can check performance and withdraw money at any time.

Our fees are a market-beating 0.45% per annum, with no exit costs and your money isn't tied in.

It's easy to harness the power of InvestEngine

- **Simply tell us about your aims**, how much you want to invest and the level of risk you're comfortable with. We then select a low-fee portfolio that suits your needs.
- Designed to mirror the performance of a range of major global indices, your portfolio will avoid the risks of investing too much in a specific company, industry or country.
- Once you're happy, we continuously monitor your portfolio, rebalancing it whenever necessary. You can also make monthly deposits to build your investment over time.

Where will your money be invested?

Your portfolio includes stocks, bonds and alternatives, weighted to match your risk appetite.

- The blocks we build with

We use ETFs (exchange-traded funds). These track stock market indices, sectors, commodities, currencies and bond markets. ETFs have far lower costs and fees – so your money works harder and you keep more of what you make.

- Make sure those nest eggs aren't all in one basket

ETFs deliver instant diversification. And as no single asset class performs best in all situations, we invest around the world and across asset types so you gain when prices rise and you're protected if one element falls.

The power behind InvestEngine

Alongside our proven technology, a team of experts with decades of experience constantly monitors your investments. And we're supported by Ramsey Crookall, a long-established, independent investment firm with over £1 billion of assets under management.

Start your InvestEngine today

As you're no doubt aware, interest rates are at an historic low and have been for several years, whereas the stock market has enjoyed solid growth over the same period. That's why we believe investing with InvestEngine is a better way to make your money work harder.
